Today's Olive, Since 1965

In the center of one of the most important olives-producing regions of Greece, in Etoloakarnania, Amalthia SA made its first steps using the olives, one of the most ancient and most useful products of Greek land.

Amalthia was founded by Athanasios Zoukas who took the initiative and made the first steps in treating, processing and marketing of olives.

Today, serving the legacy of toils and values of two generations and with a vision to let them, in turn, as supplies for future generations, we take care of our products one by one and on a daily basis, because we want to be proud of their excellent quality.

This valuable commodity, the olive tree, is being taken care of in a way that every step is in absolute balance and is taken with absolute respect for the environment, our employees, our suppliers and our producers. After all, the blessed olive can only be treated with love and respect!

Our goal

Together with our workers, suppliers and producers, we have managed to deliver our products to more than 25 countries in Europe, USA, Canada, Australia & Asia.

Our love for olives, and our commitment to follow the strictest quality standards, as far as health and safety, place high demands both to us and to our staff.

Quality Assurance

We invest in buildings and machinery but also in management systems in order to respond successfully to the most demanding markets, offering high quality products and services. The packaging of our products is always an absolute criterion to maintain the authenticity and naturalness, and it is also done with respect to modern health and safety requirements.

- **TRACEABILITY**

By ensuring the traceability system production is normalized, all stages of production are programmed and controlled and all data recorded.

- **CERTIFICATES**

Our production facilities follow the strictest regulations and are certified for quality and food safety with the following certificates: BRC, BIOHELLAS QUALITY MANAGEMENT SYSTEM.
